Nobody has done it better than Microsoft for the individual consumer! "User Friendly" Those are the words that matter most and the other jealous nerds are not at all concerned with this. Bill Gates built the better mouse trap and it is entirely up to them to come up with a competitive operating system. It is quite obvious that they can not and that their answer is to screw it up for the rest of us so they can sell inferior products that do not work well with other systems and force us to hire technicians to keep the systems running.

Thank you!
